

Document Object Model (DOM)

- You can imagine an HTML document as a nested set of boxes.
- Tags such as <body> and </body> enclose other tags, which in turn contain other tags or text.
- Here's an example document:

```
<!doctype html>
<html>
  <head>
    <title>My home page</title>
  </head>
  <body>
    <h1>My home page</h1>
    <p>Hello, I am Marijn and this is my home page.</p>
    <p>I also wrote a book! Read it
      <a href="http://eloquentjavascript.net">here</a>.</p>
  </body>
</html>
```
